## PYRUVATE KINASE DEFICIENCY TEST RESULT

N/N

### Result Codes:

- N/N    no copies of PK deficiency, cat is normal
- N/K    1 copy of PK deficiency, cat is normal but is a carrier
- K/K    2 copies of PK deficiency, cat is or will be affected. Severity of symptoms cannot be predicted\*

Erythrocyte Pyruvate Kinase Deficiency (PK deficiency) is an inherited hemolytic anemia that occurs in Abyssinian, Somali and some domestic shorthair cats. This condition is inherited as an autosomal recessive. Breedings between carriers will be expected to produce 25% affected kittens.

\*If your cat is diagnosed as homozygous for PK deficiency, we recommend that you contact your veterinarian for information on disease progression and management.
